Math Parent Guide

There are several foundational skills that will help your child be successful in fourth grade, including addition/subtraction fluency and multiplication fluency. Here is a handy guide to help you at home!

The **Hot** Seat

Look under your seat to find either a blue or yellow sticky note.

- If you have a blue sticky note, you will be completing the Area Model Strategy for Division.
- If you have a yellow sticky note, you will be completing the Expanded Notation Model for Division.
- We will go over the answers after you've had some time to solve.

Area Model

845 divided by 5

	100	+	60	+	9	
5	$\begin{array}{r} 845 \\ - 500 \\ \hline 345 \end{array}$		$\begin{array}{r} 345 \\ - 300 \\ \hline 45 \end{array}$		$\begin{array}{r} 45 \\ - 45 \\ \hline 0 \end{array}$	

Partial Quotients

$$\begin{array}{r} 100 \\ + 60 \\ + 9 \\ \hline 169 \end{array}$$

Menu

$$5 \times 10 = 50$$

$$5 \times 100 = 500$$

Menu

$$5 \times 6 = 30$$

$$5 \times 60 = 300$$

Menu

$$5 \times 9 = 45$$

Expanded Notation

845 divided by 5

Menu

$$5 \times 10 = 50$$

$$5 \times 100 = 500$$

$$5 \times 6 = 30$$

$$5 \times 60 = 300$$

$$5 \times 9 = 45$$

$$\begin{array}{r} \overline{) 845} \\ \underline{500} \\ 345 \\ \underline{300} \\ 45 \\ \underline{45} \\ 0 \end{array} \quad \begin{array}{l} 9 \\ 60 \\ 100 \end{array} \Bigg] 169$$

Long Division

Standard: NC.4.NBT.6

Find whole-number quotients and remainders with up to **three-digit dividends** and **one-digit divisors** with place value understanding using rectangular arrays, area models, repeated subtraction, partial quotients, properties of operations, and/or the relationship between multiplication and division.

Things to Note...

- Students should practice problems in and out of context.
- Students will use multiplication and division facts along with place value knowledge to solve long division.
- Students will solve problems with remainders and be able to analyze remainders in real-life situations.
